

TP-LINK ADSL+2 Modem Router Configuration Process :

1. Connecting your computer to the modem router (Wired or Wireless)

- Wired

Connect the computer to your modem router and the LAN LED lights up

- Wireless

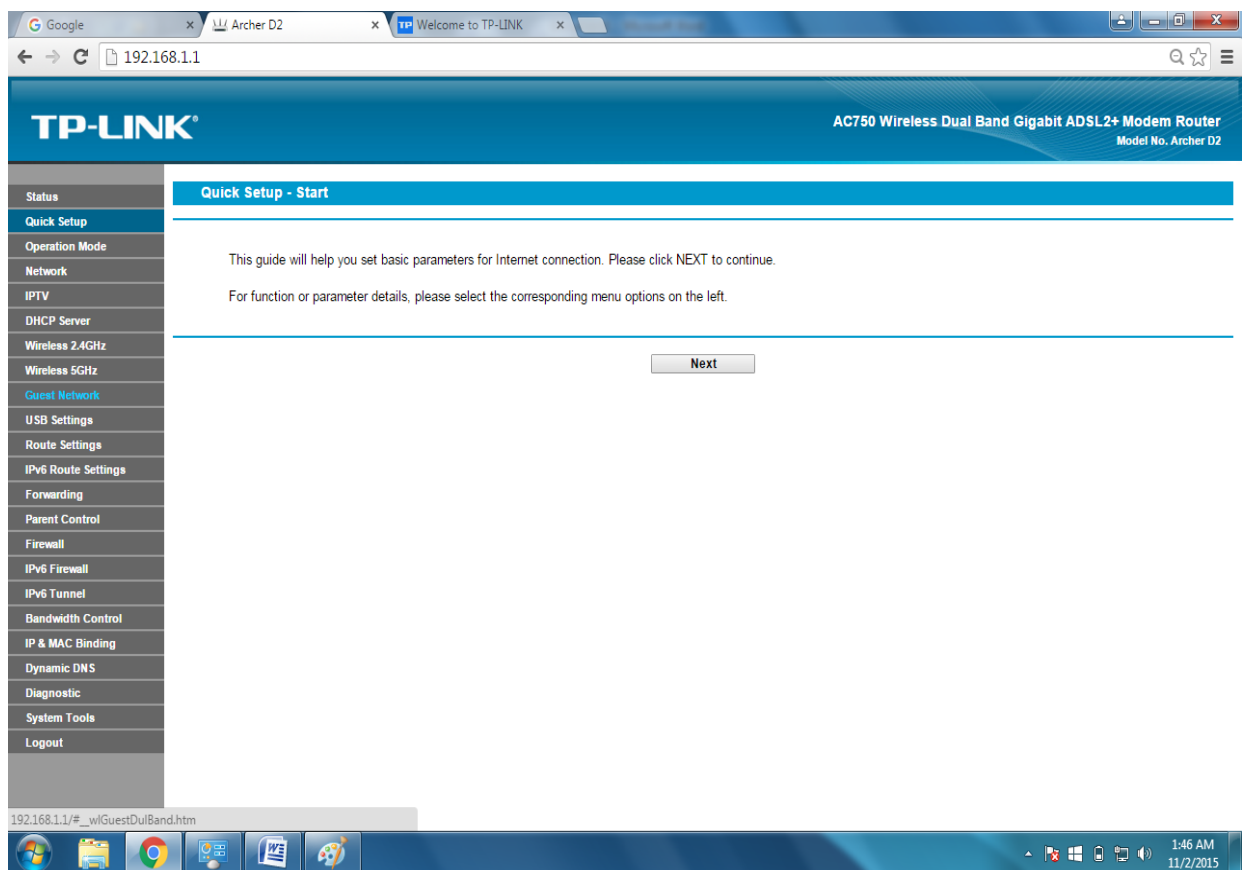

Connect wirelessly by using the SSID (network name) and Wireless Password printed on the product label at the bottom of the modem router.

2. Configuring the modem router via a web browser

Launch a web browser and type in <http://tplinkmodem.net> or 192.168.1.1

3. Go to the Quick Setup

4. Click on Next

5. Select your Region and Time Zone, then click Next.

The screenshot shows a web browser window with the address bar displaying '192.168.1.1'. The browser tabs include 'Google', 'Archer D2', and 'Welcome to TP-LINK'. The page title is 'TP-LINK' and the subtitle is 'AC750 Wireless Dual Band Gigabit ADSL2+ Modem Router Model No. Archer D2'. The left sidebar contains a list of navigation links: Status, Quick Setup, Operation Mode, Network, IPTV, DHCP Server, Wireless 2.4GHz, Wireless 5GHz, Guest Network, USB Settings, Route Settings, IPv6 Route Settings, Forwarding, Parent Control, Firewall, IPv6 Firewall, IPv6 Tunnel, Bandwidth Control, IP & MAC Binding, Dynamic DNS, Diagnostic, System Tools, and Logout. The main content area is titled 'Quick Setup - Region and Time Zone' and contains the text 'Please select your region and time zone.' Below this text are two dropdown menus: 'Region' with 'India' selected, and 'Time Zone' with '(GMT+05:30) Madras, Kolkata, Mumbai, New Delhi' selected. At the bottom of the main content area are two buttons: 'Back' and 'Next'. The Windows taskbar at the bottom shows the time as 1:46 AM on 11/2/2015.

Back Save

10. Click on Finish.

The screenshot displays the TP-LINK Archer D2 web interface in a browser window. The address bar shows the URL 192.168.1.1. The page title is "AC750 Wireless Dual Band Gigabit ADSL2+ Modem Router Model No. Archer D2". The left sidebar contains a list of navigation options: Status, Quick Setup, Operation Mode, Network, IPTV, DHCP Server, Wireless 2.4GHz, Wireless 5GHz, Guest Network, USB Settings, Route Settings, IPv6 Route Settings, Forwarding, Parent Control, Firewall, IPv6 Firewall, IPv6 Tunnel, Bandwidth Control, IP & MAC Binding, Dynamic DNS, Diagnostic, System Tools, and Logout. The main content area is titled "Quick Setup - Complete" and contains the following text:

Note: If you are configuring the modem router wirelessly, changing the wireless settings will cause you to be disconnected from it. Please reconnect to the modem router using the new SSID(WiFi name) and password.

Setup Status:

Time Zone Configuring:	Success
Operation Mode Configuring:	Success
WAN Connection Releasing:	Success
WAN Connection Configuring:	Success
Gateway and DNS Configuring:	Success
Wireless Configuring:	Success

Quick Setup is complete. Please click FINISH to exit.

Note: If the Modem Router still can not connect to the Internet, please click "Network > WAN Settings" menu on the left to confirm the WAN connection type and mode on the WAN Settings page.

A "Finish" button is located at the bottom center of the main content area.

The Windows taskbar at the bottom shows the time as 1:53 AM on 11/2/2015.
